

## **LIST OF AMALGAM SEPARATORS FOR DENTAL FACILITIES**

The following list of amalgam separators is **not all-inclusive** and the Narragansett Bay Commission (NBC) may give written approval to use other separators that do not appear on the list. The NBC only approves separators which are ISO 11143 certified and provide 99% amalgam removal. Prior to installing and/or purchasing any equipment, plans of the dental office and the chosen amalgam separator must be submitted to and approved by the NBC.

The separators on this list were obtained from information supplied by the companies to the NBC staff. ISO 11143 Certification information supplied by the companies is available for review upon request. Interested persons should contact the company for a complete description of equipment. This list is provided as a service to dentists by the NBC and does not constitute an endorsement of any company listed. It is strictly the responsibility of the user to ensure that equipment is installed by properly licensed professionals, in accordance with all federal, state, and local laws, rules and regulations, and building codes.
